

SCHOOL FIELD TRIPS

Bring Your Students on a Field Trip to Drake Science Center

Choose from

✓ *Planetarium Shows*

✓ *LEGO Engineering Labs*

Or do both! Schedule a one or two hour field trip today!

LEGO Engineering Labs

We offer programs that will keep your students challenged as they apply engineering principles to build structures, simple machines, complex machines, mars rovers and robotics.

Planetarium Shows

Enhance your students' astronomy studies with a visit to the planetarium to explore the universe and learn about the seasonal constellations, rotation, comets, asteroids, and other phenomenon. We have many programs to choose from, appropriate to your grade level and matching national and state science education standards.

A comprehensive listing of all of our programs are shown by grade level on our website.

Bus Scholarships

We have a limited number of bus scholarships available for schools that schedule a two-hour field trip. Ask about the requirements when you call our office to schedule your programs.
